SKYLINE SKY-LITES DELIVERS QUALITY & PERFORMANCE

With imaginative design, the use of skylights can be a dramatic addition to any room. A feeling of spaciousness and freedom will result from an open view to the sky above. Brightening your home with Skyline Sky-Lites and the invigorating rays of the sun can enhance the quality of your family's life and raise the value of your home.

For more than 50 years, Skyline Sky-Lites has manufactured a complete line of skylights, monumental glass structures, and sloped glazing systems. We are capable of providing anything from a small dome skylight to a fifty-foot free-spanning glass structure. With many impressive references throughout the country, we have earned ourselves the reputation of an industry leader.

Skyline combines its own innovations with the latest technology to guarantee every product we manufacture meets our unparalleled commitment to

quality. Our meticulous craftsmanship and innovative product engineering ensure that each skylight we manufacture meets every technical requirement for both performance and longevity. Only the highest quality materials become a part of our products.

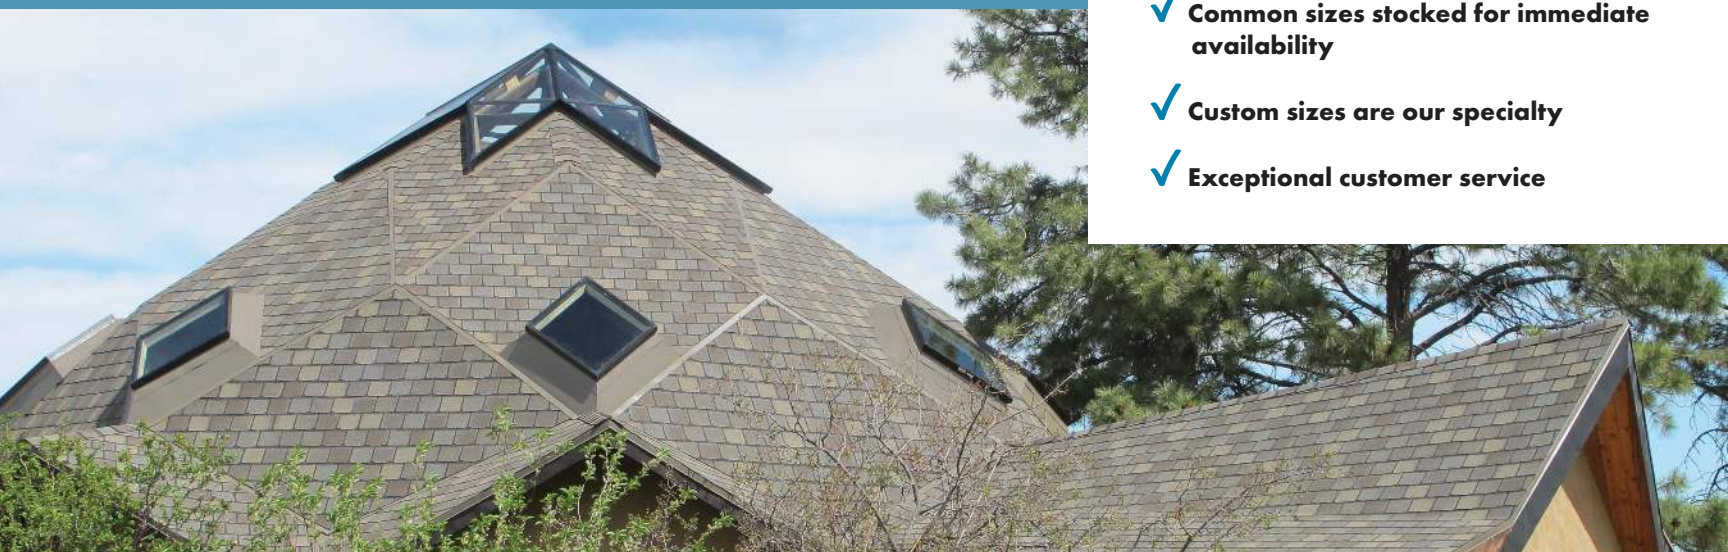

**Our products
have been
manufactured
locally since
1973.**

All Skyline Sky-Lites are manufactured to support at least a 30 psf combined load.

For greater loading requirements, please contact customer service. No warranty is made or implied that

Skyline Sky-Lites are suitable to resist human impact, and appropriate safety devices should be used when this is a concern.

Our sales and technical staff are eager to serve you with design assistance, advice, and pricing for the appropriate product to match your daylighting requirements.

- ✓ **Common sizes stocked for immediate availability**
- ✓ **Custom sizes are our specialty**
- ✓ **Exceptional customer service**

Aluminum Framed Skylights

CURB-MOUNT • INSULATED CURB • THERMOBRAKE™

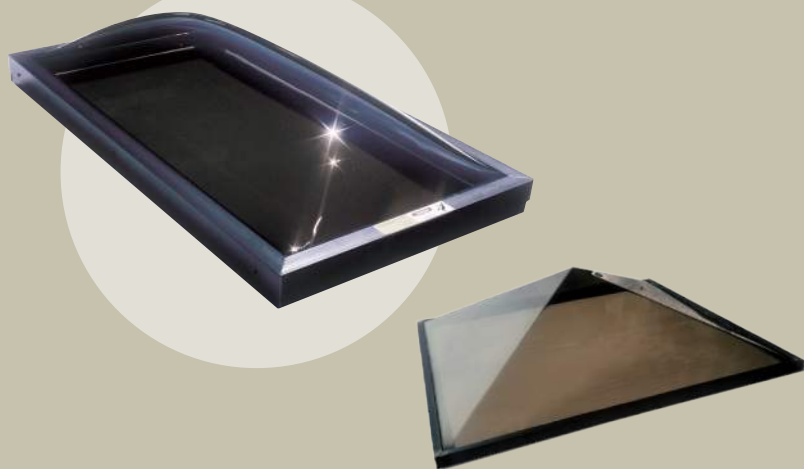

These aluminum framed skylights have been the standard for the industry for many years. Thermally broken frames are used for condensation resistance and energy performance. A gasket between the glazing and frame provides a tight seal while a continuous weep slot around the perimeter drains moisture to the exterior.

- Mounting Styles are available as curb mount or insulated curb.
- Available with acrylic domes or pyramids, or flat insulated glass.
- Single, double, or triple glazing options.
- Frame finishes are available in dark bronze or clear anodized, and natural mill aluminum.
- Independently tested for compliance with AAMA/WDMA/CSA 101/I.S.2/A440 as required by the International Building Code.

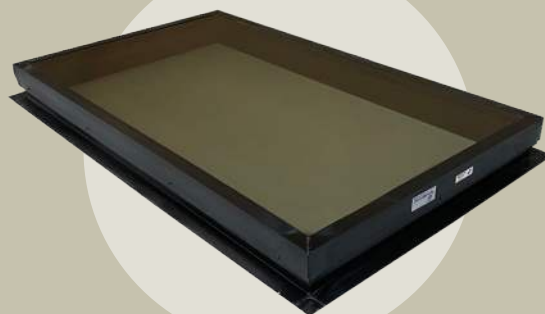

ACRYLIC DOME AND PYRAMID

Our most popular curb-mount model is available in a wide range of sizes and glazings.

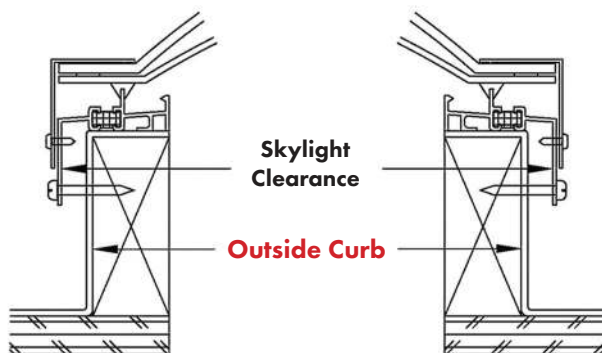

FLAT GLASS

All glass units come standard with low-e coated, tempered over laminated glass.

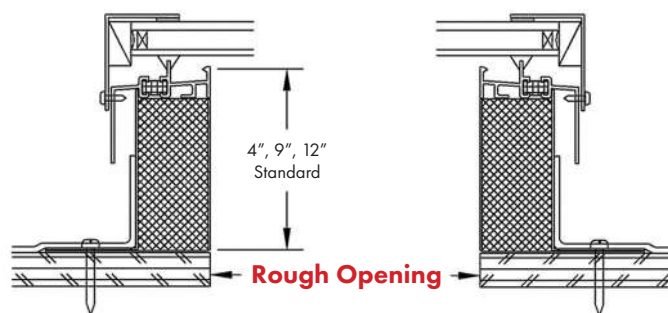

HOW TO MEASURE

INSULATED CURB ("DECK-MOUNT") SKYLIGHT

See back for all available standard sizes. Custom sizes also available upon request.

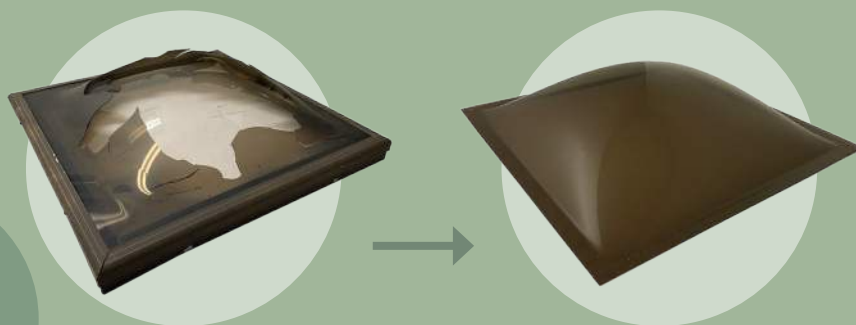

Replacement Glazings

- Glazing colors are available in clear, bronze tinted, or white translucent.

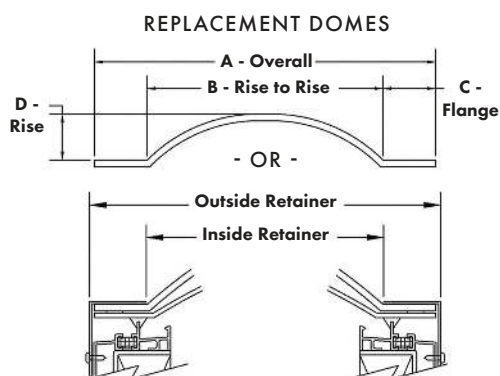

Skyline supplies standard and custom replacement glazings for all skylights, regardless of the original manufacturer. Replacing broken or defective glazings may be a simpler and more cost-effective solution than replacing an entire skylight. Glazing replacement does not require the removal or replacement of roofing materials or flashings. Download our replacement glazing worksheets at www.skylites.com or call us with your exact specifications.

Save time and money with replacement glazings!

When the unexpected happens, we've got you covered!

Continuous Skylights

COST EFFECTIVE SKYLIGHT OPTIONS

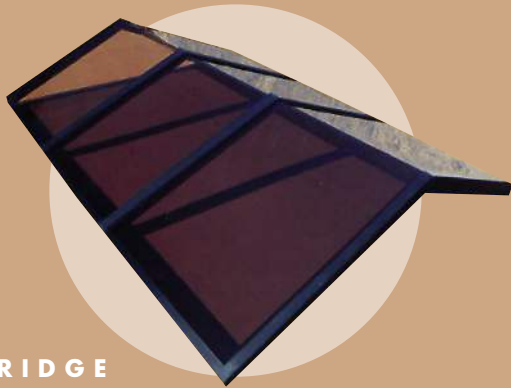

Skyline’s continuous vault, ridge, pyramid, and tandem skylights offer the designer an opportunity to include dramatic daylighting in a cost-effective and easy to install manner. Bridging the gap between a single bay unit skylight and a monumental metal-framed structural skylight, these intermediate products represent an unparalleled value to achieve maximum daylighting potential and remarkable aesthetic effect. All continuous skylights are made to order and available in both standard and custom widths in any length. Visit www.skylites.com for standard width dimensions and configurations.
